

# Contents

<b>0</b>	<b>Foreword</b>	<b>1</b>
<b>1</b>	<b>Introduction to Live Electronics</b>	<b>3</b>
<b>2</b>	<b>Fixed-Media and Interactive Systems</b>	<b>5</b>
2.1	Studio Tools . . . . .	5
2.1.1	Sequencers . . . . .	5
2.1.2	DAWs and Samplers . . . . .	6
2.1.3	Integrated Systems . . . . .	6
2.1.4	Composing in the Studio . . . . .	6
2.2	Interactive Systems . . . . .	7
2.2.1	Roles of Interactive Systems . . . . .	7
2.2.2	Composition and Performance Issues . . . . .	8
<b>3</b>	<b>Description of Live Electronic Pieces</b>	<b>10</b>
3.1	Karlheinz Stockhausen: Mantra (1970) . . . . .	10
3.1.1	Gestures Controlling the System and Their Interpretation . . . . .	11
3.1.2	Sound Processing Unit . . . . .	11
3.1.3	Mapping . . . . .	12
3.1.4	The Role of Electronics . . . . .	12
3.2	Andrea Szigetvári: CT (2010) . . . . .	13
3.2.1	Gestures Controlling the System . . . . .	13
3.2.2	Gesture Capture and Analysis Strategies . . . . .	14
3.2.3	Sound Synthesis and Processing Unit . . . . .	16
3.2.4	Mapping . . . . .	16
<b>4</b>	<b>Listing and Description of Different Types of Sensors</b>	<b>19</b>
4.1	Defining Controllers . . . . .	19
4.2	Augmented Instruments . . . . .	20
4.3	Instrument-like Controllers . . . . .	21
4.4	Instrument-inspired Controllers . . . . .	23
4.5	Alternate Controllers . . . . .	24
<b>5</b>	<b>Structure and Functioning of Integra Live</b>	<b>27</b>
5.1	History . . . . .	27
5.2	The Concept of Integra Live . . . . .	28
5.2.1	Structure of the Arrange View . . . . .	29

5.2.2	Structure of the Live View . . . . .	32
5.3	Examples . . . . .	33
5.4	Exercises . . . . .	36
<b>6</b>	<b>Structure and Functioning of Max</b>	<b>37</b>
6.1	History . . . . .	37
6.2	The Concept of Max . . . . .	38
6.2.1	Data Types . . . . .	39
6.2.2	Structuring Patches . . . . .	40
6.2.3	Common Interface Elements and Object Categories . . . . .	40
6.2.4	Mapping and Signal Routing . . . . .	42
6.3	Examples . . . . .	43
6.3.1	Basic Operations . . . . .	43
6.3.2	Embedding . . . . .	44
6.3.3	Signal Routing . . . . .	45
6.3.4	Data Mapping . . . . .	46
6.3.5	Templates . . . . .	47
6.4	Exercises . . . . .	49
<b>7</b>	<b>OSC — An Advanced Protocol in Real-Time Communication</b>	<b>50</b>
7.1	Theoretical Background . . . . .	50
7.1.1	The OSC Protocol . . . . .	50
7.1.2	IP-based Networks . . . . .	51
7.2	Examples . . . . .	52
7.3	Exercises . . . . .	53
<b>8</b>	<b>Pitch, Spectrum and Onset Detection</b>	<b>55</b>
8.1	Theoretical Background . . . . .	55
8.1.1	Signal and Control Data . . . . .	55
8.1.2	Detecting Low-Level Parameters . . . . .	56
8.1.3	Detecting High-Level Parameters . . . . .	56
8.2	Examples . . . . .	57
8.2.1	Analysis in Integra Live . . . . .	57
8.2.2	Analysis in Max . . . . .	58
8.3	Exercises . . . . .	61
<b>9</b>	<b>Capturing Sounds, Soundfile Playback and Live Sampling. Looping, Transposition and Time Stretch</b>	<b>62</b>
9.1	Theoretical Background . . . . .	62
9.1.1	Methods of Sampling and Playback . . . . .	62
9.1.2	Transposition and Time Stretch . . . . .	63
9.2	Examples . . . . .	64
9.2.1	Sampling in Integra Live . . . . .	64
9.2.2	Sampling in Max . . . . .	65
9.3	Exercises . . . . .	67

<b>10 Traditional Modulation Techniques</b>	<b>70</b>
10.1 Theoretical Background . . . . .	70
10.1.1 Amplitude and Ring Modulation . . . . .	70
10.1.2 Frequency Modulation . . . . .	71
10.1.3 The Timbre of Modulated Sounds . . . . .	72
10.2 Examples . . . . .	73
10.2.1 Ring Modulation in Integra Live . . . . .	73
10.2.2 Modulation in Max . . . . .	74
10.3 Exercises . . . . .	75
<b>11 Granular Synthesis</b>	<b>78</b>
11.1 Theoretical Background . . . . .	78
11.2 Examples . . . . .	79
11.2.1 Granular Synthesis in Integra Live . . . . .	79
11.2.2 Granular Synthesis in Max . . . . .	80
11.3 Exercises . . . . .	82
<b>12 Sound Processing by Filtering and Distortion</b>	<b>84</b>
12.1 Theoretical Background . . . . .	84
12.1.1 Filtering . . . . .	84
12.1.2 Distortion . . . . .	85
12.2 Examples . . . . .	87
12.2.1 Filtering and Distorting in Integra Live . . . . .	87
12.2.2 Filtering and Distorting in Max . . . . .	87
12.3 Exercises . . . . .	92
<b>13 Sound Processing by Delay, Reverb and Material Simulation</b>	<b>95</b>
13.1 Theoretical Background . . . . .	95
13.1.1 Delay . . . . .	95
13.1.2 Reverberation . . . . .	95
13.1.3 Material Simulation . . . . .	96
13.2 Examples . . . . .	97
13.2.1 Material Simulation in Integra Live . . . . .	97
13.2.2 Delay and Reverb in Max . . . . .	97
13.3 Exercises . . . . .	98
<b>14 Panning, Surround and Multichannel Sound Projection</b>	<b>100</b>
14.1 Theoretical Background . . . . .	100
14.1.1 Simple Stereo and Quadro Panning . . . . .	100
14.1.2 Simple Surround Systems . . . . .	101
14.1.3 Multichannel Projection . . . . .	101
14.1.4 Musical Importance . . . . .	101
14.2 Examples . . . . .	102
14.2.1 Spatialisation in Integra Live . . . . .	102
14.2.2 Spatialisation in Max . . . . .	103
14.3 Exercises . . . . .	105

---

<b>15 Mapping Performance Gestures</b>	<b>106</b>
15.1 Theoretical Background . . . . .	106
15.1.1 Mapping . . . . .	106
15.1.2 Scaling . . . . .	107
15.2 Examples . . . . .	107
15.2.1 Mappings in Integra Live . . . . .	107
15.2.2 Mappings in Max . . . . .	109
15.3 Exercises . . . . .	111
<b>Bibliography</b>	<b>115</b>
