Contents

Contents 3

1 Introduction 8
- 1.1 The history of OpenCL . . . 8
- 1.2 The present and future of OpenCL . . . 13
- 1.3 OpenCL and Flynn-classes . . . 14
- 1.4 What is OpenCL used for? . . . 15
- 1.5 About the book . . . 17
  - 1.5.1 The aim and use of the book . . . 17
  - 1.5.2 What is the book based on? . . . 18
  - 1.5.3 Hardware environment . . . 18

2 My first OpenCL program 20
- 2.1 Programming environment . . . 20
- 2.2 Hello world . . . 21
- 2.3 Compile, link, run . . . 26
- 2.4 Summary . . . 27

3 The OpenCL model 28
- 3.1 The OpenCL specification . . . 28
  - 3.1.1 Platform model . . . 29
  - 3.1.2 Execution model . . . 29
  - 3.1.3 Memory model . . . 33
  - 3.1.4 Programming model . . . 37
- 3.2 Summary . . . 38
- 3.3 Excercises . . . 38

4 The OpenCL API 40
- 4.1 Error handling . . . 40
- 4.2 Retain/Release . . . 42
- 4.3 Naming conventions . . . 43
- 4.4 Platform layer . . . 43
  - 4.4.1 Identification of platforms . . . 43
  - 4.4.2 Devices, subdevices . . . 47
  - 4.4.3 Context . . . 56
- 4.5 Runtime layer . . . 61
  - 4.5.1 Command queue . . . 62

4.5.2 Event objects . . . 62
4.5.3 Buffer objects and memory handling . . . 65
4.5.4 Synchronization . . . 79
4.5.5 Program objects . . . 83
4.5.6 Kernel objects . . . 101
4.5.7 Execution of kernels . . . 106
4.6 Summary . . . 116
4.7 Excercises . . . 116

5 The OpenCL C language 118
5.1 The OpenCL C programming language . . . 118
5.2 Data types . . . 118
5.2.1 Atomic data types . . . 118
5.2.2 Vector data types . . . 119
5.2.3 Conversion . . . 121
5.3 Expressions . . . 123
5.3.1 Arithmetic conversion . . . 123
5.3.2 Operators . . . 123
5.4 Qualifiers . . . 124
5.5 Control statements . . . 129
5.6 Built-in functions . . . 129
5.6.1 Workitem functions . . . 129
5.6.2 Mathematical functions . . . 131
5.6.3 Geometrical functions . . . 134
5.6.4 Relational functions . . . 134
5.6.5 Functions related to the loading and storage of vector values . . . 135
5.6.6 Synchronization functions . . . 136
5.6.7 Async copies from global to local memory, local to global memory and prefetch . . . 138
5.6.8 Atomic functions . . . 139
5.6.9 `printf` . . . 141
5.7 Summary . . . 142
5.8 Excercises . . . 142

6 Case study - Linear Algebra - Matrix multiplication 143
6.1 Mathematical background . . . 143
6.2 Measuring the runtime . . . 146
6.3 CPU implementation . . . 147
6.4 Naive OpenCL implementation . . . 149
6.5 OpenCL C optimization . . . 156
6.6 Increasing the granularity of the parallelization . . . 157
6.7 The utilization of private memory . . . 158
6.8 The utilization of the local memory . . . 160
6.9 Summary . . . 162
6.10 Exercises . . . 163

7 Case study - Digital image processing - Convolution filter 166
7.1 Theoretical background . . . 166
7.2 CPU implementation . . . 168
7.3 Naive OpenCL implementation . . . 172
7.4 Simple C optimization . . . 175
7.5 The utilization of constant memory . . . 176
7.6 Utilization of the local memory . . . 177
7.7 Summary . . . 182
7.8 Exercises . . . 183

8 Image and sampler objects 186
8.1 Image objects . . . 188
8.1.1 Instantiation . . . 188
8.1.2 Reading/writing and filling image objects . . . 193
8.1.3 Other functions . . . 196
8.2 Sampler objects . . . 197
8.3 OpenCL C . . . 199
8.3.1 Types . . . 199
8.3.2 Qualifiers . . . 200
8.3.3 Instantiation . . . 200
8.3.4 Functions . . . 201
8.4 Example . . . 205
8.5 OpenCL 1.1 . . . 209
8.6 Summary . . . 214
8.7 Exercises . . . 214

9 Case study - Statistics - Histograms 216
9.1 Theoretical background . . . 216
9.1.1 The concept of histograms . . . 216
9.1.2 Applications of histograms . . . 217
9.1.3 Adaptive thresholding . . . 219
9.2 Histogram computation on CPU . . . 220
9.3 Naive OpenCL implementation . . . 222
9.4 Naive OpenCL implementation using 2D index range . . . 224
9.5 OpenCL implementation using image objects . . . 226
9.6 The utilization of local memory . . . 229
9.7 Another "fastest" implementation . . . 231
9.8 Summary . . . 236
9.9 Exercises . . . 236

10 Case study - Signal Processing - Discrete Fourier transform 239
10.1 Theoretical background . . . 239
10.1.1 Complex numbers . . . 239
10.1.2 The introduction of the discrete Fourier transform . . . 240
10.2 Example . . . 244
10.3 Applications of the discrete Fourier transform . . . 245
10.4 CPU implementation . . . 249

10.5 Naive OpenCL implementation . . . 251
10.6 Simple OpenCL C optimization . . . 254
10.7 The utilization of the local memory . . . 256
10.8 The utilization of vector types . . . 258
10.9 The utilization of vector types and the local memory . . . 260
10.10 The fast Fourier transform . . . 261
10.11 Fast Fourier transform and the utilization of the local memory . . . 268
10.12 Summary . . . 273
10.13 Exercises . . . 274

11 Case study - Physics - Particle simulation 278
11.1 Theoretical background . . . 278
11.2 CPU implementation . . . 282
11.3 Naive OpenCL implementation . . . 284
11.4 The utilization of vector data types . . . 288
11.5 OpenCL C optimization . . . 289
11.6 The utilization of the constant memory . . . 291
11.7 The utilization of the local memory . . . 291
11.8 The packing of data . . . 293
11.9 Summary . . . 295
11.10 Exercises . . . 295

12 OpenCL extensions 297
12.1 The organization of OpenCL extensions . . . 297
12.2 The use of OpenCL extensions . . . 299
12.3 Interactive particle simulation . . . 300
12.3.1 OpenCL and OpenGL without interoperation . . . 301
12.3.2 OpenCL and OpenGL with interoperation . . . 306
12.4 Summary . . . 311
12.5 Exercises . . . 312

13 Related technologies 313
13.1 Combined application of OpenCL and other parallel technologies . . . 313
13.1.1 Thread safety . . . 313
13.1.2 Combined applications . . . 314
13.2 The C++ interface . . . 315
13.3 NVidia CUDA . . . 315
13.4 WebCL . . . 319
13.5 Exercises . . . 322

14 Epilogue 323

A cmake 326
A.1 `cmake` in general . . . 326
A.2 The first `cmake` project . . . 328
A.3 Compiling OpenCL applications with `cmake` . . . 333
A.4 Exercises . . . 336

B R **338**
B.1 Creating simple graphs in R 338
B.2 Exercises 342

C Image I/O **343**
C.1 Portable GrayMap - PGM 343
C.2 Portable Network Graphics - PNG 346
C.3 Exercises 351

Bibliography **352**

Index **354**
